

Chandramathi Raju, Department of Medical Microbiology, Faculty of Medicine,
University of Malaya, Faculty of Medicine, University Malaya, Kuala Lumpur, Malaysia

As an academician, she has been teaching and supervising students in the field of Microbiology, Virology and Immunology. Over the years, she has diversified and tried her hand in the field of immunopathogenesis of other microorganisms as well namely, bacteria (*Burkholderia pseudomallei* *Klebsiella pneumoniae*) and viruses (Dengue and Zika). Currently, her main research area focuses on the association of intestinal microorganisms (bacteria, viruses, intestinal parasites) with colorectal cancer. Her novel ideas coupled with her enthusiasm to unravel the pathogenesis and mechanisms employed by the aforementioned microbes allows her to progress and remain relevant in the research field with more than 70 ISI publications and 55 conference papers. She has received a number of grants at University and National levels. In addition of being an academician and a researcher, she is also a member of the board of directors for Asian Society of Pharmacognosy and a member of the Society of Free Radical Research, India as well as the Malaysian Society of Parasitology and Tropical Medicine. She has also been reviewing articles for publications in reputable journals such as PloS One, BMC Cancer, Frontiers in Microbiology, Gut Pathogens, Medicine, and Parasitology Research.
